

## How to Use:

- Click on the green checkmarks to toggle all information on the page.
- Click on the grey checkmark next to Grad Year to view all grade levels.
- All graphs and scorecards will adjust to show information based on filters.
- Hover over a section on a pie chart to view more information.

## Number of Students Enrolled

How to Use:

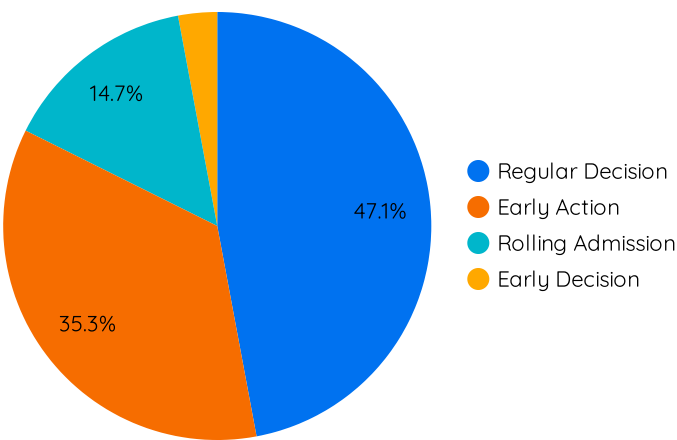

- Filter by Full Name to view a specific student or a group of students
- Filter by Institution Name to view information for a certain school or group of schools
- Filter by National Admissions Percentage view schools within a certain acceptance rate range
- Round filter will display applications from a specified rounds checked
- Safety, Match, Reach filter will display applications based on the checked categories
- Rank filter will display applications according to checked ranks
- Decision filter will display applications by the checked admissions decision
- All applicable graphs and charts will adjust based on these filters
- Hover over a pie chart section to view specific data
- Click on the three vertical dots that appear when you hover over graphs to sort the data

Data Explanations

- **Applications per Round:** displays the number of applications submitted by round with a corresponding pie chart
- **Safety, Match, Reach?:** displays the total number of safeties, matches and reaches applied to with a corresponding pie chart
- **Decisions Received:** displays the total number of different decisions received with a corresponding pie chart
- **Most Number of Applications:** displays the most applied to institutions
- **Institutions by Decision:** displays number of acceptances, waitlists or rejections per institution, sorted by the most common combination. To view only a certain type of decision, use the Decision checkmark filter
- **Institutions by Safety, Match, or Reach:** displays the most common combination of institution and difficulty category. Use Safety, Match or Reach checkmark filter to view specific categories
- **Institutions by Round Applied:** displays the most common combination of institution and application round. Use Round checkmark filter to view specific rounds
- **Institution by Rank:** displays the most common combination of institution and rank. Use the rank filter to view schools at a specific rank (any combination of first, second, third or unranked)
- **Averages per Student:** the average number of applications, acceptances and rejections by a student. Will adjust based on filters
- **Total for Class:** the total number of applications, acceptances and rejections for the 2021 class. Will adjust based on filters.
- **Institutions by Admissions Rate:** Compare the national admissions percentage to the percentage of Prepory students admitted. Reference the number of applications to an institution by Prepory students for better context.

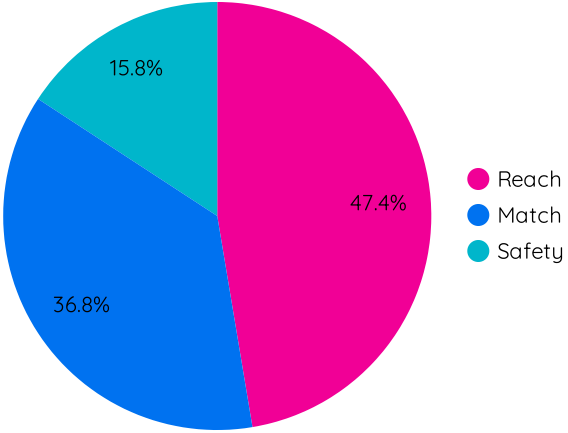

Applications per Round

Institutions by Admissions Rate

Institution Name	National Admissions Percentage	Prepory Admissions Percentage
University of Florida	39.31%	0.00%
University of Central Florida	42.53%	0.00%
University of Miami	32.15%	0.00%
Florida Atlantic University	59.32%	0.00%
Nova Southeastern University	78.54%	66.67%
Yale University	6.35%	0.00%
Florida International University	58.56%	50.00%
Florida State University	36.78%	0.00%
Stetson University	68.40%	0.00%
Johns Hopkins University	11.48%	0.00%

How to Use:

- Slide the dots on National Admissions Percentage and School Rank to set a range for both parameters
- Filter by Institution Name to view data for a specific institution or group of institutions
- All data on the page will adjust to these filters
- Click on the graph icon next to "View Institutions By..." to specify a view.
- Hover over a circle on the map to view the number of acceptance or applications to that institution

Data Explanations

- **National Averages:** Average test scores for students applying to top 50 Institutions and the average acceptance rate of the top 20 and top 50 institutions in the country. Will adjust to filters.
- **Prepory Students Applying:** the total number of Prepory applicants and acceptances to top 50 institutions, along with the average admissions percentage of those students to top 50 institutions. Will adjust to filters.
- **National versus Prepory Admissions Percentage:** Compare the admissions percentage of Prepory students to the national average for each top 50 institution. Also visualized in a graph that is sorted by National Admissions Percentage. Hover over a dot to view the data. Reference number of Prepory applicants per Institution for a stronger context.
- **View Institutions By:** Adjustable table that displays information based on filter. Filter will ONLY apply to the table, not the entire page. Options include Applicants, Acceptances and Admissions Percentage of Prepory Students for table one, and Test Scores, School Rank and National Admissions Percentage for table two.
- **Google Maps:** displays the number of applicants and acceptances per institution, respectively. Larger circles indicate more acceptances or applicants. Zoom functionality supported.

How to Use:

- Filter by Student Name to display data for a specific student or group of students. Filter adjusts all applicable graphs.
- Slide the dot to filter by National Admissions Percentage and view data for institution with acceptance rates within a certain range. Filter only adjusts last scatter chart
- Slide the dot to restrict student data shown to a certain range of percentage of sessions attended. Filter adjusts all applicable graphs.

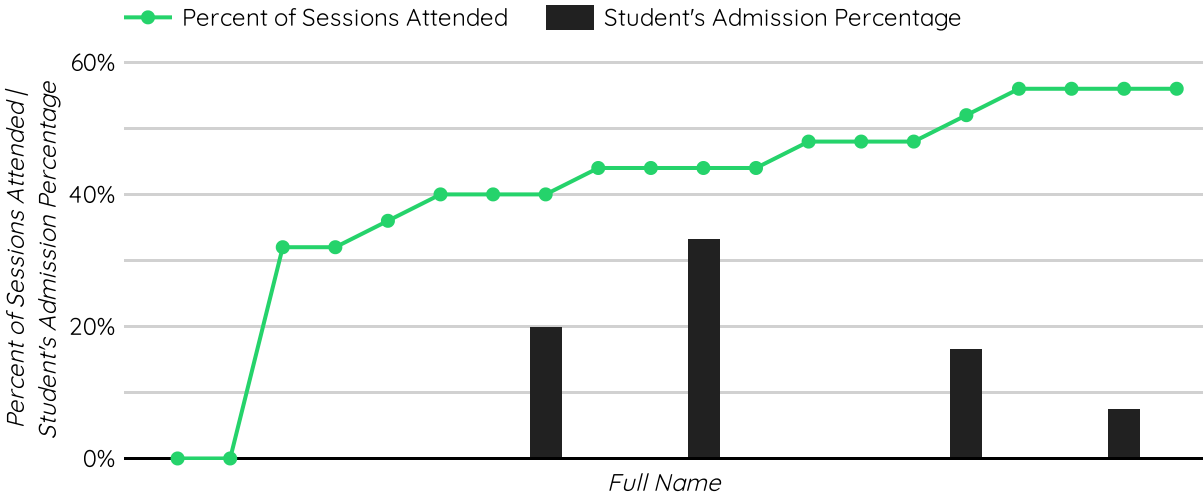

Data Explanations

- **Percent of Sessions Attended versus Admissions Percentage:** correlates percent of sessions attended to admissions percentage for each student. Shown in both a combo chart (left) and scatter plot (right). Equal height bar and line graphs (combo chart) and positive linear trend line (scatter plot) indicate ideal correlation (more sessions attended equals greater admissions percentage)
- **Percent of Sessions Attended versus Number of Admissions:** same as Admissions Percentage but looks at number of admissions rather than admissions percentage. Does not skew data positively for Early Decision students or students who apply to a limited number of schools, who have an increased probability of having high admissions percentages. Use in combination with Admissions Percentage comparison.
- **National versus Prepory Admissions Percentage:** compares both admissions percentages. Reference number of application per institution for better contextualization. Positive, linear trendline with higher concentration of points in upper-left corner is ideal (Prepory students outperforming National Average)
- **Decision versus Rank:** correlates decision received with students top three choices. Ideally, there would be many acceptances to schools within a students' top three
- **Decision versus Round:** correlates decision received with round applied. Ideally, the round applied would not negatively impact the student's admissions decision
- **Decision versus Safety, Match or Reach:** correlates admissions decision with acceptance difficulty. Ideally, students would get into a higher number of their safeties and outperform expectations with reaches

Accepted	Match	2	
Accepted	Safety	1	

National versus Prepory Admissions Percentage

How To Use:

- Slide the dots on the filters to set a range for the specific metric. Any chart or graph using that metric will automatically adjust
- View data for a certain student or group of students by checking their name on the dropdown
- View specific grade levels by checking on/off graduation years. All graphs and charts will adjust accordingly

Data Explanations

- **Test Scores:** Compare PSAT, SAT and ACT scores per student. PSAT and SAT are on the left y-axis; ACT is on the right y-axis. Contextualize data by using sample sizes (how many students took each type of test). Click on the "AZ" button that appears when you hover on the graph to sort the data. Hover over a point on the line to view a student's scores.
- **Weighted/Unweighted GPA versus Percentage of Sessions Attended:** Correlates Weighted GPA to Percentage of Sessions Attended. Ideally, points would be concentrated in the upper right corner with a positive trend line, indicated that many students are attended sessions and earning high GPAs as a result.
- **Grade Point Average (Line Chart):** Compares unweighted and weighted GPA for each student. Ideally, weighted GPA (ideally close to 6.0) would be 1 to 2 points above unweighted (ideally above 3.5) and both lines would be fairly straight, indicating that all students are doing well rather than a select few.
- **Percentage of Sessions Attended versus Advanced Level Courses:** compares the percentage of sessions attended to the number of AP/IB/AICE courses taken throughout high school. Ideally, students attending more sessions would challenge themselves more, especially in the 11th and 12th grade
- **Grade Point Average (Scatter Chart):** compares weighted and unweighted GPA for each student. Students with strong weighted and unweighted GPAs are in the upper right. Students in the bottom right should challenge themselves with harder classes. Students near the top left are challenging themselves but performing poorly. A linear positive trend line indicates that students are balancing both types of GPA correctly.
